Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

1. This action is in response to the communication filed on January 29, 2002. Claim 1 was originally received for consideration. No preliminary amendments for the claim were filed. Claim 1 is currently under consideration.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claim 1 recites the limitations "said first short term private key," "said first long term private key," and "said first long term private key" in limitations (b)-(d). There is insufficient antecedent basis for this limitation in the claim.
3. Claim 1 recites the limitation "said second long term public key" in the final limitation of the claim. There is insufficient antecedent basis for this limitation in the claim.

Claim Rejections - 35 USC § 101

35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

4. The claimed invention is directed to non-statutory subject matter. Claim 1 fails to transform a physical subject matter to a different state, as the steps recited in the claim

represent a computation of a key in conjunction with data gathering, or making available other data, as required by the computation. As such, no specific physical manipulation of the math algorithm is realized in the claim when the algorithm is instantiated.

Therefore, the claim 1 is non-statutory under the abstract idea exception. See MPEP IV.B.1.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

5. Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Vanstone et al. (U.S. Patent 5,889,865).

Regarding claim 1, Vanstone discloses:

A method of generating a key by a first correspondent, wherein said key is computable by a second correspondent, said method comprising the steps of:

(a) "***making available to said second correspondent a first short term public key***" (column 7 lines 39-42);

(b) "***obtaining a second short term public key from said second correspondent***" (column 7 lines 39-42);

(c) ***"computing a first exponent derived from said first short term private key, said first short term public key, and said first long term private key"*** (column 7 lines 40-47);

(d) ***"computing a second exponent derived from said first short term private key, k said first long term public key, said second short term public key and said first long term private key"*** (column 7 lines 40 – 47);

"computing a simultaneous exponentiation of said first exponent with said second short term public key and said second exponent with said second long term public key" (column 7 lines 40 – 47).

Conclusion

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Kaveh Abrishamkar whose telephone number is 571-272-3786. The examiner can normally be reached on Monday thru Friday 8-5.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Ayaz Sheikh can be reached on 571-272-3795. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
